### Project Description

---

This development involved the construction of 142,000 sq ft portal frame, comprising of 115,000 sq ft of high bay and 27,000 sq.ft. low bay space.

The frame was 32m to the underside of the haunch in high bay and 20m to underside of the haunch in low bay.

The building also had 24,000 sq ft of integral four-storey office block space.

This construction of this section was in-situ concrete floors on proprietary steel decking.
