
The Triangle Block, Uxbridge

Project Description

The project features 132 luxury apartments spread over 4 blocks.

Blocks are 7 and 8 storeys in height with reinforced concrete frames.

Nolan Associates have designed and detailed the structure and produced all of the reinforced concrete drawings and schedules.

All blocks have a podium level transfer structure with Peikko delta beams which minimise downstands where transfer elements are required.

The building features two underground car parks created by permanent sheet piled walls. The building has piled foundations due to the poor ground.

Client	St Modwen Developments
Contractor	Galliford Try
Architect	Pick Everard
Value	£20 million
