
Topaz Business Park

Bromsgrove

Project Description

The project is comprised of six, two-storey office blocks of varying sizes. The structures are steel-framed, with precast concrete floors and cavity masonry walls.

The foundations are pad bases on vibro-improved fill. An extensive “cut and fill” exercise is required to form the finished site levels.

The external works drawing scheme incorporates an infiltration pond and soakaways.

Client	Topaz MHZ LLP (Maximus)
Contractor	Benniman Ltd
Architect	Level Seven Architects Armstrong Burton Group
Value	c £5 million
